

Do you have a screening protocol?

Clinical features of COVID-19:
Cough or shortness of breath (lower respiratory tract infection)*
With or without fever ($T \geq 100.4^{\circ}\text{F}$)
*Isolated nasal congestion or rhinorrhea do not meet criteria
PLUS EXPOSURE
One of the following:
1. Close contact with a confirmed case OR
A PUI (person under investigation) for COVID-19
2. Any international travel in the preceding 14 days
3. Lives in an area with widespread community transmission

Do you have isolation rooms/procedures?

Expedite isolation precautions
Apply surgical masks to patient, family, escorting staff
Escort patient, family immediately from waiting area/public spaces
Place in private room with closed door if negative pressure room unavailable

Do you have the proper PPE and enough quantities?

PPE Recommendations:
Patients with mild/moderate symptoms use **Modified Expanded Precautions**
Gown + Gloves + Surgical Mask + EYE PROTECTION
Patients requiring nebulized treatments, possible transfer via 911 use **Expanded Precautions**
Gown + Glove + N95 Mask + EYE PROTECTION

Do you have FDA approved testing kit from CPL?

Are your providers trained to take proper samples?

Do you have a cleaning protocol after testing?

Stable for Outpatient Testing
Rapid Flu A/B as clinically indicated
COVID-19 Testing as indicated
CPL lab kit (likely 2-4 day turn around)
Nasopharyngeal Swab (Insert a swab into the nostril parallel to the palate. Leave the swab in place for a few seconds to absorb secretions)
Clean room with hospital-approved disinfectant while still in PPE, close room 1 hour
Limit outpatient labs and CXR if COVID-19 testing is pending, respiratory support, hydration

Do you have a follow-up process for patients who have been tested?

Disposition Protocol - Discharge home for quarantine and report to SNHD as appropriate
Follow-up protocol for patients
